

Sheridan – Buffalo Road

Owner

WYDOT

Location

Interstate 90 between Sheridan & Buffalo, WY

Contract Value

\$19,183,206.40

Company Role

Prime Contractor

Project Description

This project involves resurfacing and 2 major slide repairs on 5.21 miles of Interstate 90 beginning at mile post 40.12 between Sheridan and Buffalo, Wyoming. The original contract amount was \$19,183,206.40 and was awarded to Oftedal March 15, 2007. Work began on the job last spring (2007) and the majority of the grading work (slide repairs) and resurfacing of the west bound lanes was completed during that year. With extraordinary amounts of spring snow delaying the project initially, much of the work was accomplished utilizing a double shift. Thanks to these efforts (and a relatively mild fall), the paving work was completed prior to winter shut down.

This year's work includes resurfacing of the east bound lanes along with minor grading and structure work. Oftedal's project staff is headed by Chris Audiss, Project Manager, and Jim Wilder, Superintendent. The contract completion date is October 31, 2008. Subcontractors on this project include:

Subcontractor

McMurry Ready Mix
Anderson Hwy Signs
Big Sky Asphalt-WY
Industrial Builders
Marchant Reclamation
